These comments appear in the Comments panel where you can review and update them. Or if you'd like to "Save" as a comment file for a particular file, click Save Comment File. In the Save Comment File dialog, you can add your comment from the Comments panel to the top of the saved file. Updating a comment file using Save Comment File leads to a Share for Review dialog where you can share the file for comment. The item created in the Share for Review dialog is a link and the link itself saves in the cloud storage folder of the application. Related to Libraries are Cloud Documents. Saving your project as a Cloud Document enables you to work on it in the iPad version of Photoshop as well as on other desktops. Cloud Documents are saved instantly and allow collaboration among multiple creators, with the Invite to Edit option. You can also create a link (using the Share for Review beta feature button) to a web-hosted version of the photo where collaborators can comment. Previous versions of cloud documents show up in a Version History panel and even name versions. Cloud documents support offline editing, too.
