You can click the icon and choose to save a new file (also known as “creating a new document”), open an existing file (selecting an image that you previously saved), or open an image file. If you have a previous saved document, you can open it from the File menu by choosing Open Recent. Once you have chosen a file, click to bring it into Photoshop to begin editing it. The next step is to select the desired layer that you would like to manipulate. You can move the layers, adjust their size, or delete them. To move a layer, first select it. Then with the Move tool, drag it to a new position. To resize a layer, use the same technique. Click once on each side of the layer to constrain it to a rectangular area. To manipulate a layer, simply drag its edges. You can drag the top, bottom, right, or left side to resize the layer. You can also rotate a layer by first clicking on the top-left corner, dragging to the top-right corner, then using the arrows to rotate the layer.
